Discover your inner radiance with small beauty shifts. You will look as good as you feel after visiting Klara Beauty Lab. Klara Chruszcz, internationally certified skin therapist with years of expertise has culled the cream of the crop, employing select licensed professionals. She has created a medical spa with a dozen private labs, each geared for specific treatments where her clients experience real results that exceed superficial expectations. Klara works up a personalized spa treatment on each client, targeting their specific needs. Treatments within a dozen medical labs include podiatry, Botox, tanning, massage, exfoliation, microdermabrasion, chemical peels, hair removal, permanent makeup and lasting Nova lash extensions as well as Klara's signature lash lifts. Indulge by appointment only.

### profile ! Report Errors

After 12 years of training and treating clients in Europe and the United States, Klara Chruszcz, owner and founder of KLARA Beauty Lab, opened the doors to her first medical spa on Manhattan's Upper East Side. As an internationally certified skin therapist and licensed make-up artist, Klara understands the importance of good health and beauty for both women and men, inside and out.

It is evident that Klara and her credentialed staff are truly devoted to pampering clients within a variety of medical labs, each dedicated to specific treatments, for a premium spa experience. Before deciding on a treatment profile every client receives a consultation to determine their personal needs. The most popular treatment by far is Klara's Signature Facial at \$250, lasting up to two hours, where you can expect Klara to incorporate elements of Reiki, sonotherapy, chromotherapy and aromatherapy. In addition, Klara provides ongoing expert insight and advise—each client takes away a comprehensive note sheet, created by Klara to simplifying at-home maintenance between visits.

Facials and massage are only the tip of the iceberg at Klara's Beauty Lab. Seasonally themed treatments and a dozen different laboratories devoted to specific treatments from head to toe make this spa especially unique. Labs treatments include exfoliation, microdermabrasion, chemical peels, Botox injections, dermal fillers, hair removal, podiatry, and sunless tanning, as well as Nova lash extensions and Klara's Signature Lash Lift.
